EMPLOYMENT HISTORY

WordPress Front-End Developer

OGO Sense

03/2019 - Present

Achievements/Tasks

- I build lively and easy-to-use websites tailored to what each client needs, using WordPress. I'm skilled in making custom WordPress themes with tools like Redux and Elementor, which lets me create websites that can grow with the business. I also make custom widgets for Elementor to add more features to the websites, making them work better and easier to use. I focus on making sure that each website not only looks great but also works well on all devices.

WordPress Front-End Developer - Project-Based

Digitalac - Digital marketing agency

2022 - Present

Achievements/Tasks

- I build WordPress websites for different clients at Digitalac Digital Marketing Agency. My job starts from the first idea of a website all the way to getting it up and running. I work closely with the agency's marketing folks to make sure the websites not only look good but also work well to get more visitors and help the business grow.

Contact : Srdjan Dukic - office@digitalac.ba

WordPress Developer

JW Maxx Solutions

05/2017 - 10/2017

Achievements/Tasks

- Handled everything from building to maintaining WordPress websites. The role involved creating aesthetically pleasing and functionally robust sites, as well as improving existing ones. Focused on enhancing On-Page SEO through strategic user experience enhancements, which helped the sites meet and exceed modern usability standards and search engine requirements. This commitment to excellence in both development and maintenance aimed to boost site performance and elevate user engagement.

WordPress Developer

Freelance

2017 - Present

Achievements/Tasks

- I take care of everything needed to build and keep up WordPress websites as a freelance developer. Make sure the websites look good and work well, whether I'm building new ones or improving ones that already exist. I pay a lot of attention to making the sites easy to use, aiming to meet the latest standards for how websites should work and what search engines expect. I look for clients on my own and handle all the details myself. You can see some of the websites I've made on my personal portfolio website.

EDUCATION

Bachelor of Engineering in Computing and Informatics - 240 ECTS

Paneuropean University "Apeiron"

2015 - 2019
